TRU-FIT

Ideal knockdown fitting for simple right angle panel assembly, mechanical tightening ensures a strong joint. The Tru-Fit fitting compromise male/female lock, which are screw mounted to the base/ side panel respectively. Wherein screw location for the male component is assisted by the integral dowels and finally held securely together by the fastener and net insert. The extensive interlocking areas have the screw-mounted component and built-in dowels ensure exceptional rigidity. This fitting is ideal for particleboard since no drilling or boring is required as in the case of mini-fix, thus zeroing on the exposed surface on the bored area in the humid atmosphere. Tru-Fit is suitable for self assemble furniture also for assembling kitchen cabinet, wardrobe, work station and general furniture in knock-down category.

KNOCK FIT PLINTH LEVELLERS

- User friendly systems 32
- Carcases re-opening made simpler by either of the two
- Eye Hole**
- access to the minifix
- 18 mm pre-lam skirting can be used all over.
- Product made from engineering polymer.
- Leveler component can be adjusted by extra long screwdriver.
- Pre-drilling on base panel made very simple & uniform from all the edges.
- Designed for pest free use.

Eye Hole

- Dismantling of carcasses poses a problem.
- Damage is either inflicted on the base-panel or the mounting block whilst exposing the mini-fix
- This hurdle has been resolved by just drilling on the eye hole and accessing the mini-fix without attempting to dislocate the mounting block from the base-panel.
